

Job Demands Analysis - BUILDING SERVICE WORKER I (COMMUNITY CENTRE)

Purpose

- The purpose of the Building Service Worker 1 (Community Centre) is to clean the City of Vancouver's community centres.

Essential Duties

- The BSW 1 (Community Centre) has 5 essential duties:

- (1) Tile and linoleum floor cleaning (D1)
- (2) Carpet cleaning (D2)
- (3) Wall and counter cleaning (D3)
- (4) Garbage and recycling (D4)
- (5) Bathroom cleaning (D5)

Summary of Demands

	Sedentary	Light	Medium	Heavy	Very Heavy
Physical			X		
Cognitive		X			

The job is **physically** demanding. The Building Service Worker (BSW) 1 needs to:

- Carry cleaning supplies that weigh between **1-9 kg.**
- Occasionally carry items that weigh up to **36 kg.**
- Push and pull carpet and floor cleaning equipment.

Workers require physical **endurance** to:

- Continuously stand and walk (95 % of their shift).

Shift Structure

- BSW 1's (Community Centre) work 4:00 am to 12:00 pm. BSW 1's get a 30 minute meal break and two 10 minute rest breaks.

Job Demands Analysis - Building Support Worker 1 (Community Centre): Summary Table

a) Physical Demands		Frequency During Shift*						Weight		Comments
		Never	Rare	Infrequent	Occasional	Frequent	Constant	Usual (kg)	Max (kg)	
Strength	Lifting - Floor to Knuckle				X			1-9	30	Cleaners, garbage/recycling bins All Duties
	Lifting - Knuckle to Waist					X		1-9	30	Cleaners, garbage/recycling bins All Duties
	Lifting - Over Head		X					1-9	30	Cleaners, garbage/recycling bins All Duties
	Carrying - with Handles				X			1-9	30	Garbage/recycling bins, mop bucket D1, D4
	Carrying - without Handles				X			1-9	30	Cleaners, garbage/recycling bins All Duties
	Pushing - Upper Extremity				X			1-9	36	Carts, vacuums, shampooers, doors, push broom All duties
	Pushing - Hips/Legs assist				X			1-9	36	Carts, vacuums, shampooers, push broom All duties
	Pulling - Upper Extremity				X			1-9	36	Carts, vacuums, shampooers All Duties
	Pulling - Hip/Leg Assist				X			1-9	36	Carts, vacuums, shampooers All Duties
	Reach - Shoulder or Above			X				Cleaning walls/vents, sweeping, vacuuming D2, D3, D4, D5		
	Reach - Below Shoulder						X	cleaning walls/vents, sweeping, vacuuming All Duties		
	Handling						X	Cleaning tools All Duties		
	Fine finger movements				X			Cleaning tools D1		
	Neck - Static Flexion					X		Looking at surfaces below shoulder level All Duties		
Mobility	Neck - Static Neutral					X		Standing, walking All Duties		
	Neck - Static Extension				X			Scanning near tops of walls D2 D3		
	Neck - Rotation				X			General cleaning duties All Duties		
	Throwing			X				Items in garbage or recycling bin D4 D5		
	Sitting	X								
	Standing						X	Throughout shift All Duties		
	Walking						X	Through areas assigned to clean All Duties		
	Running/Jumping	X								
	Climbing			X				Up stairs D1, D3, D4		
	Bending/Stooping					X		While cleaning areas below shoulder height All Duties		
	Crouching			X				While cleaning All Duties		
	Kneeling			X				While cleaning D1, D3, D4, D5		
	Crawling	X								
	Twisting			X				Emptying garbage/recycling D4		
	Balancing			X				On stairs D1, D3, D4		
	Travelling	X								

Job Demands Analysis - Building Support Worker 1 (Community Centre): Summary Table (continued)

a) Physical Demands (continued)		Frequency During Shift						Comments
		N	R	I	O	F	C	
Sensory / Perception	Hear/Conversations			X				Receive instructions from supervisor
	Hear/Other Sounds	X						
	Vision/Far						X	Cleaning building All Duties
	Vision/Near		X					
	Vision/Colour			X				Select proper hose on the cleaning fluid dispenser, paper recycling D2, D4
	Vision/Depth						X	Clean buildings All Duties
	Perception/Spatial						X	Clean buildings All Duties
	Perception/Form			X				Equipment selection All Duties
	Feeling	X						
	Speech			X				Communicate to co-workers All Duties
Work Environment	Inside Work						X	Work done inside Community Centre buildings All Duties
	Outside Work			X				Done every morning D4
	Slippery			X				Wet floors, showers, spills D1, D2, D5
	Congested worksite	X

Writing	X			
Irregular Hours	X			
Operating Equipment		X		Power Burnisher, Carpet Shampooer D1 D2

Frequency rating definitions

* The frequency rating definitions are from the Dictionary of Occupational Titles (DOT, 1991, 4th edition) published by the US Department of Labor.

	Time per Day	Percentage of Shift
Never	0 minutes	0 %
Rare	0 - 5 minutes	0-1 %
Infrequent	6 - 25 minutes	2-5 %
Occasional	26 minutes - 2.5 hours	6-33 %
Frequent	2.6 - 5.25 hours	34-66 %
Constant	5.26 - 8 hours	67-100 %

Physical Environment

The work takes place at the City of Vancouver's non-market housing units. General illumination is provided by overhead florescent light fixtures that are in the ceilings throughout the various community Centre buildings.

Staffing Levels

The BSW 1 (Community Centre) will either work alone for most of their shift, or in teams of 2 individuals dependent upon their duties and where they clean.

Figure 1: Cleaning Agent Dispenser

Tools and Equipment Used

The BSW 1 (Community Centre) uses a variety of supplies and tools while working. The list includes the cleaning agent dispenser, cleaning materials and supplies, cleaning tools, power tools, and equipment (carts and bins).

Cleaning Agent Dispenser

Most cleaning agents come pre-mixed from the Cleaning Agent Dispenser (similar to that pictured above in figure 1). It can be used to dispense: glass cleaner, disinfectant, floor cleaner, carpet cleaner, toilet cleaner.

Cleaning Materials and Supplies

In addition to the cleaning agents that are in the Cleaning Agent Dispenser, the BSW 1 (Community Centre) will also use metal polish.

Supplies used by the BSW 1 (Community Centre) include: paper napkins, toilet paper, garbage bags, light bulbs, refill bottles of hand soap, rubber gloves, and dust masks.

Cleaning Tools

Cleaning tools used by the BSW 1 (Community Centre) include: brooms, push brooms, mops, long handle dust pan, duster, rags, buckets, extension cords, small hand tools, toilet plunger, toilet brush and “wet floor” signs.

Power tools

Power tools used by the BSW 1 (Community Centre) include: power burnisher (see Figure 2 below), cannister vacuum, backpack vacuum, and carpet shampooer.

Figure 2: The Power Burnisher

Figure 3: The Carpet Shampoo Machine

Other Equipment

Garbage containers, recycle bins, and carts.

Description of Essential Duties

Essential Duty 1: Tile and Linoleum Floor Cleaning

The tasks that make up Essential Duty 1 (Tile and Linoleum Floor Cleaning) are: sweep floors (Task 1), mop and wax floors (Task 2), buff and burnish floors (Task 3), and re-sweep floors (Task 4).

Sweep floors (Duty 1, Task 1)

Figure 4: Push Broom

Figure 5: Broom and Dust Pan

The BSW 1 (Community Centre) walks from the janitor room that is closest to their assigned cleaning area. They will select a push broom (see Figure 4), a regular broom (see Figure 5), and a long-handle dust pan (see Figure 5) and take them to the area that needs to be swept. The handle of the dust pan is 1 m off the ground.

The push broom is used to sweep the halls. The BSW 1 (Community Centre) holds the push broom and uses it to push the debris on the floor to one area. The BSW 1 (Community Centre) repeats this process until all the debris on the floor has been pushed to a particular area. They then use the normal brooms to sweep the

accumulated debris into the long-handle dust pan. When the dust pan is full, the BSW 1 (Community Centre) will empty the contents into a nearby trash receptacle.

The BSW 1 (Community Centre) will also use the push broom to remove scuff marks on the floor. They put the bristle part of the push broom over a scuff mark, put one foot on the bristle, and then move their foot “side to side” with enough pressure to erase the scuff mark.

Mop and wax floors (Duty 1, Task 2)

Figure 6: Mopping

Figure 7: Mop Bucket

After the floors have been swept, the BSW 1 (Community Centre) will go back to the janitor room to get a mop and bucket (see Figures 5 and 6) and fills it with water and cleaner. The desired amount of cleaner is dispensed into a measuring cup. The measuring cup is then emptied into a mop bucket and is half filled with water. The bucket will weigh between 12-13 kg depending on how much water is added.

The BSW 1 (Community Centre) then pushes the filled bucket to the area that was swept clean of debris. The BSW 1 (Community Centre) mops by placing one hand

near the top of the mop and the other closer to the middle of the mop. They walk backwards, mopping in an S shape. To wring out the mop, the BSW 1 (Community Centre) will lift the mop and place it into the wringer. A lever 0.5 m off the ground on the side of the mop bucket is then pulled. This requires a force of 7 kg.

The waxing procedure is similar to the mopping procedure. Wax is squeezed from a bottle and mopped onto the linoleum floor areas. A mop similar to the ones pictured in Figures 6 and 7 is used to evenly distribute the wax on the floor.

Buff and burnish floors (Duty 1, Task 3)

Figure 8: Power Burnisher

After the floors are mopped and allowed to dry, they get burnished. There are 2 types of machines used in the process. The Power Burnisher (see Figure 8) is commonly used to burnish floors. The Burnisher is wheeled to the area to be burnished and is plugged in. The BSW 1 (Community Centre) turns on the rotating Burnisher head through levers on the handles. They push the Burnisher to move it along the floors. Due to the motion of the bristles on the bottom, the Burnisher will

move side to side while it's being pushed forward over the floors. It requires 15-20 kg of force to push forward and attention to make sure that it does not get out of control moving side to side. Care must be taken when using a Burnisher that no pieces of grit or other miscellaneous pieces of hard debris stuck under the Burnisher. This can lead to the floors getting scratched.

Re-sweep floors after burnishing (Duty 1, Task 4)

After the floors are burnished, they are re-swept in a manner identical to Duty 1, Task 1 floor sweeping.

Table of Physical, Cognitive, and Psychosocial Demands

The physical, cognitive, and psychosocial demands of essential duty 1 are summarized in table 1. Table 1 located at the end of the report starting on page 24.

Essential Duty 2: Carpet Cleaning

The tasks that make up Essential Duty 2 (Carpet Cleaning) are: vacuuming (Task 1), and carpet shampooing (Task 2).

Vacuum (Duty 2, Task 1)

Figure 9: Canister Vacuum

Figure 10: Backpack Vacuum

The BSW 1 (Community Centre) will walk to the nearest room or closet used for storing cleaning supplies and equipment and take one of the canister vacuums to carpeted areas. The BSW 1 (Community Centre) plugs in the vacuum and turns it on by flicking a switch. The vacuum is pushed and pulled across the carpeted areas. It is similar to the one pictured in Figure 9. While vacuuming the BSW 1 (Community Centre) has to move chairs and garbage cans out of the way. The BSW 1 (Community Centre) vacuums around large packages or parcels. Some areas have a great deal of boxes.

Some areas that require vacuuming are not easily accessible with the Canister Vacuum. In these cases, the BSW 1 (Community Centre) may don a backpack vacuum.

The vacuum is worn on the BSW 1 (Community Centre)'s back (see Figure 9). It has extensions that allow it to vacuum areas that are high or cramped (i.e. where the upright vacuum cannot easily get to). The backpack vacuum weighs 12 kilograms. Backpack vacuums can be used to make some of the vacuuming duties easier, but their use is not required.

Shampoo carpet (Duty 2, Task 2)

Figure 11: Carpet Shampooer

Figure 12: Shampoo Extension

The Carpet Shampooer (see Figure 11) has two 15 cm wheels and a handle that is 1 m off the ground. When operating the Carpet Shampooer, the BSW 1 (Community Centre) begins in one corner of a carpeted area and pulls the machine backwards until they reach a wall. Once it reaches the wall, it is turned and the process is repeated. When cleaning carpets in an area where it is difficult to turn, there is a vacuum extension that can be added to the side of the machine (see Figure 12).

The BSW 1 (Community Centre) uses the sink and the automatic dispenser in the janitorial room to pre-mix water and carpet shampoo into a 2 gallon polymer tank

using the same procedures as described earlier (see Mop and wax floors - Duty 1, Task 2). The BSW 1 (Community Centre) then manually moves the tank and the Carpet Shampooer to the carpeted area that requires shampooing. A compressed air sprayer is used to manually apply the water-shampoo mix from the 2 gallon tank. After the carpet has been sprayed, the Carpet Shampooer is used to vacuum the water-shampoo mix.

The force required to move the Carpet Shampooer depends on the amount of water in it. When moving it from place to place, it can be tilted backwards to put weight on its wheels. This allows it to be pushed. It requires a sustained force of close to 10 kg to move.

Table of Physical, Cognitive, and Psychosocial Demands

The physical, cognitive, and psychosocial demands of essential duty 2 are summarized in table 2. Table 2 is located at the end of the report starting on page 27.

Essential Duty 3: Wall and Counter Cleaning

The tasks that make up Essential Duty 3 (Wall and Counter Cleaning) are: wiping counters and dusting (Task 1), window and glass cleaning (Task 2), and spot cleaning walls and vents (Task 3).

Wiping counters and dusting (Duty 3, Task 1)

Figure 13: Counter Cleaning

The BSW 1 (Community Centre) will take a rag from their cart and spray cleaning fluid onto it with a spray bottle. They will then walk to a surface that needs to be cleaned and wipe the area. They wipe around objects on counters and desks to avoid disturbing items. They repeat this process, occasionally rinsing out the cloth at nearby sinks, until the counters in nearby rooms are clean.

Window and glass cleaning (Duty 3, Task 2)

The BSW 1 (Community Centre) uses spray glass cleaner to wash the windows. They use a pad with a rough textured, non abrasive nylon face on one side to scrub heavy dirt from the window. The other side of the pad is plush. It is used to wash the

windows. A 30 cm or 34 cm rubber squeegee with swivel handle is used to remove the water from the windows, preventing streaks.

Spot cleaning walls and vents (Duty 3, Task 3)

While in an area, the BSW 1 (Community Centre) makes a determination as to whether or not the walls and vents require cleaning. If the walls require spot cleaning, the BSW 1 (Community Centre) will take a rag from their cart and spray cleaning fluid onto it with a spray bottle. They will then walk to a wall or vent that needs to be cleaned and wipe the area. They wipe around objects on pictures and objects on the wall to avoid disturbing items. They repeat this process, occasionally rinsing out the cloth at nearby sinks, until the walls and vents in the room are clean. If the walls do not require cleaning, they are left alone.

Table of Physical, Cognitive, and Psychosocial Demands

The physical, cognitive, and psychosocial demands of essential duty 3 are summarized in table 3. Table 3 is located at the end of the report starting on page 30.

Essential Duty 4: Garbage/Recycling Pick Up

The tasks that make up Essential Duty 4 (Garbage/Recycling Pick Up) are: garbage pick up (Task 1), recycling pick up (Task 2), and other garbage pick up (Task 3).

Garbage Pick Up (Duty 4, Task 1)

Figure 14: Emptying the Garbage

The BSW 1 (Community Centre) will move their cart (see the cart in Figure 14) or a large garbage bag to the areas they need to clean. They then walk around to the personal garbage containers in each area and empty the containers. The garbage containers weigh up to 3 kg. They need to be lifted from floor to waist level. They will then dump the contents of the garbage containers into the cart or the garbage bag. If necessary, they will replace the plastic garbage bag in the personal container. The replacement bags are located in the storage compartment of the BSW 1 (Community Centre) carts. They repeat the dumping of the personal containers until the large garbage bag is full. Once this happens, the BSW 1 (Community Centre) will

take the garbage bag to the large garbage container similar to the one pictured in figure 15.

Figure 15: Garbage container

The Building Service Worker 1 (Community Centre) also checks the rooms where clients go to drop their garbage down a chute. The chute opens up above the large container pictured in figure 15. The BSW ensures that all the garbage has been dumped into the chute and that the chutes are not clogged.

Recycling Pick Up (Duty 4, Task 2)

The BSW 1 (Community Centre) takes the recycling to the blue recycling containers when they have the time to do so. The amount of material that needs to be placed into the recycling is low enough that the BSW 1 (Community Centre) makes infrequent trips to do this.

Other Garbage Pick Up (Duty 4, Task 3)

At varying frequencies dependant upon the location of the centre, the BSW 1 (Community Centre) will walk around the community centre with a long handled dust

pan a broom and a needle handling device (see figure 16). They will sweep garbage around the residence into the long handled dust pan and dump it into a trash receptacle. Any needles are picked up using the needle handler pictured in figure 17 and deposited into a used needle container similar to the one pictured in figure 18. The needle container is stored in a secure place, such as the manager's office, to prevent anyone from trying to access the used needles.

Figure 16: Needle Handler

Figure 17: Needle Disposal Container

Table of Physical, Cognitive, and Psychosocial Demands

The physical, cognitive, and psychosocial demands of essential duty 4 are summarized in table 4. Table 4 is located at the end of the report starting on page 33.

Essential Duty 5: Bathroom Cleaning

The tasks that make up Essential Duty 5 (Bathroom Cleaning) are: sweep floors (Task 1), wash floors (Task 2), replenish supplies in the bathroom (Task 3), clean/disinfect (Task 4), garbage pick up (Task 5), spot clean walls (Task 6), and unclog drains and toilets (Task 7).

Sweep Floors, (Duty 5, Task 1)

The BSW 1 (Community Centre) sweeps the floors in bathrooms in the same fashion as they do in floor sweeping (see D1, T1).

Wash Floors (Duty 5, Task 2)

The BSW 1 (Community Centre) washes the floor in a manner similar to floor washing (see D1, T2) but they do not wax the tiled floors in the washrooms.

Replenish supplies in the bathroom (Duty 5, Task 3)

Figure 19: Refilling the dispenser

The BSW 1 (Community Centre) fills up the paper towel dispensers, toilet paper dispensers, and liquid soap dispensers when necessary. To do this, they get the

needed supplies from the janitorial area and carry them to the bathroom. To fill up the paper towel dispenser the BSW 1 (Community Centre) unlocks it and then pulls open the lid. The empty paper roll is removed from the dispenser and placed in the recycling. They lift the full roll of paper towel and place it in the dispenser. The toilet paper rolls are replaced in a manner similar to the paper towel, except that there is no need to open a lid to replace the full roll of toilet paper. To full up the soap dispenser, the BSW 1 (Community Centre) needs to unlock and open the dispenser lid. They hold the lid open while raising the soap container to the top of the dispenser. They pour in the soap while holding the dispenser lid open. The liquid soap containers come in 4 L jugs. They weigh 3-4 kg when full.

Some dispensers contain bags. When these soap bags need to be replaced, the soap dispenser is opened and the old bag is removed by the BSW. The BSW 1 (Community Centre) then takes a full bag of soap and places it in the soap dispenser.

Clean/Disinfect (Duty 5, Task 4)

Figure 21: Toilet Cleaning

The BSW 1 (Community Centre) cleans counters and walls in the same way as when they are wiping counters (see D3 T1). The BSW 1 (Community Centre) uses gloves when cleaning the bathroom and uses stronger cleansers to sanitize. They use scrub brushes to clean toilets and urinals. This requires spraying cleaner onto the surface and scrubbing the area until it is clean. The scrubber weighs 0.5 kg. The spray bottle weighs 2 kg. The location and design of some toilets requires the BSW 1 (Community Centre) to bend forward at the waist in order to scrub the toilets clean (see Figure 11). The BSW also cleans the shower walls to remove any build up. They spray the shower cleaner and wipe the walls in a similar manner as that described above.

Garbage Pick Up (Duty 5, Task 5)

The BSW 1 (Community Centre) picks up the garbage in bathrooms in the same fashion as they do in garbage pick up (see D4, T1).

Unclog Drains and Toilets (Duty 5, Task 6)

The BSW 1 (Community Centre) will sometimes need to pick wet paper out of drains in sinks to prevent overflow. The BSW 1 (Community Centre) may need to use a toilet plunger to unplug blocked toilets.

Table of Physical, Cognitive, and Psychosocial Demands

The physical, cognitive, and psychosocial demands of essential duty 5 are summarized in table 5. Table 5 is located at the end of the report starting on page 36.

Description of Non-essential Tasks

The BSW 1 (Community Centre) may be required to perform other work tasks on an occasional basis. Examples of the tasks that may be performed are: assisting groups with setting up rooms for events, remove staples from carpets, dust blinds, clean out refrigerators in employee areas, rake leaves outside, use a power washer to clean the outside of the building, clean outside sidewalk, replacing overhead florescent light fixtures, snow removal, clean railings, spot clean doors, opening fitness centre doors in the morning for patrons, and some community centres may require the BSW 1 (Community Centre) to move the large garbage bins (similar to the one pictured in figure 15) to areas where the dump trucks can access them.

Data Collection

The PDA observations took place on Aug 13, 2004. The employee was observed for 4 hours at Trout Lake Community Centre. Supplementary data was gathered by interviews with the Community Centre Building Support Worker.

Report finalized on Aug 23, 2004 by Christopher Kimmie, MSc candidate UBC School of Occupational and Environmental Hygiene

Table 1: BSW 1 (Community Centre) Essential Duty 1 - Tile and Linoleum Floor Cleaning

Operating Equipment		X		Carpet Shampooer, Vacuum

Frequency rating definitions

The frequency rating definitions are from the Dictionary of Occupational Titles (DOT, 1991, 4rth edition) published by the US Department of Labor.

	Time per Day	Percentage of Shift
Never	0 minutes	0 %
Rare	0 - 5 minutes	0-1 %
Infrequent	6 - 25 minutes	2-5 %
Occasional	26 minutes - 2.5 hours	6-33 %
Frequent	2.6 - 5.25 hours	34-66 %
Constant	5.26 - 8 hours	67-100 %

Table 3: BSW 1(Community Centre) Essential Duty 3 - Wall and Counter Cleaning

a) Physical Demands		Frequency During Shift						Weight		Comments
		Never	Rare	Infrequent	Occasional	Frequent	Constant	Usual (kg)	Max (kg)	
Strength	Lifting - Floor to Knuckle			V	V	V		1-9	30	Varies from infrequent to frequent
	Lifting - Knuckle to Waist			V	V	V		1-9	30	"
	Lifting - Over Head		V	V				1-9	30	Varies from rare to infrequent
	Carrying - with Handles	X								
	Carrying - without Handles		V	V	V	V		1-9	30	Varies from rare to frequent
